### Scrum Master at Tiger Sheep                    *Oct 2017 - Oct 2018*

- Facilitated daily standups, sprint planning, backlog grooming, and retrospective meetings for one Scrum team
- Coached Agile values, shifting team and company focus to collaboration and continuous integration
- Achievements: Implemented Scrum, serving as Scrum Master to cut time to delivery from 1-3 months to 1-2 weeks with better overall quality and team engagement

### Lead Software Developer at Tiger Sheep                    *Sep 2014 - Oct 2018*

- Direct manager of 15 employees, overseeing day-to-day tasks, assignments, and conflict resolution
- Hired and trained cross-functional developer, support, and sales team
- Reported team, resource, and project status to senior management and CEO
- Managed over 100 successful team projects and upgrades for multi-million dollar companies such as Woodard Cleaning and Restoration, Global Electronics Services, and Oversea Casings
- Primary contact for new clients, often traveling on-site to gather client needs and determine scope and pricing of projects
- Created several proprietary Javascript tools and libraries enabling rapid development

### Medical Systems Programmer in the US Air Force                    *Dec 2013 - Sep 2014*

- Lead small team responsible for transitioning and updating 8 enterprise baselines to new platforms (IE10, ColdFusion10, .NET/C#, consolidated enterprise architecture overhaul) based on emerging requirements.
- Worked ahead of coding teams to test and fix potential errors presented by new technologies and techniques, passing these changes/knowledge back to streamline future development.
- Conceptualized and consolidated enterprise level reuse library.
- Created and lead junior servicemember mentorship seminars, attended by between 8 and 15 people, and consisted of between 1 and 3 panel members offering advice, answering questions, and providing valuable networking and public speaking experience.

### Logistics Systems Programmer in the US Air Force        *Aug 2012 - Dec 2013*

- Acted as Program Management Office (PMO) Configuration Management (CM) team lead, technical developer lead, and database support technician for the Air Force's primary deployment tool, the Logistics Module (LOGMOD).
- Maintained a nearly 15 year history of the program's efforts in digital and physical CM repository.
- Generated, validated, and enforced Air Force Software Engineering Process documentation to track program progress and contract adherence.

### Data Routing Technician in the US Air Force        *Apr 2005 - Aug 2012*

- Managed worldwide network of 33 UNIX-based data routing servers, ensuring by-the-millisecond delivery of terabytes of weather data.
- Lead small team of subject-matter experts for Weather Product Management and Distribution System (WPMDS) and related Java-based web service, on-call 24/7 to solve complex data delivery issues from government, civilian, educational, and foreign government agencies.
- Evaluated, tested, and reviewed new software platforms and products for enterprise viability.
- Created scripts to add new functionality to legacy systems, modernize interfaces, and entirely replace non-functioning capabilities.

### Software Tester in the US Air Force        *Apr 2004 - Apr 2005*

- Developed and maintained testing documentation for several baselines, working alongside coding teams to ensure all requirements are not only represented but testable and tested.
